

CLINICAL RESEARCH HIGHLIGHTS -

BRAIN CARE

In a clinical evaluation conducted over approximately **60 DAYS**,
the reported outcomes included:

CLINICAL PARAMETER		REPORTED OUTCOME	
	Blood Pressure (Hypertensive Patients)	81%	Reduced
	Epilepsy (Seizure Frequency)	>90%	Improvement
	Anxiety	53%	Improvement
	Stress	87%	Improvement
	Depression	71%	Improvement
	Insomnia	60%	Improvement
	Memory-Related Issues	85%	Improvement
	Giddiness, Jerks & Weakness	90%	Improvement

These findings suggest that **BRAIN CARE** may be a promising natural intervention for **STRESS-RELATED DISORDERS** with potential benefits for **CARDIOVASCULAR, NEUROLOGICAL and MENTAL HEALTH.**
