

## CLINICAL RESEARCH HIGHLIGHTS – HEART CARE

In a clinical evaluation conducted over approximately **60 DAYS**,  
the reported outcomes included:

| CLINICAL PARAMETER                                                                                                                       | REPORTED OUTCOME                                                                                                |
|------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|
|  <b>Total Cholesterol (TC)</b><br>(mg/dL)               |  <b>47.57%</b> reduction     |
|  <b>Low Density Lipoprotein (LDL)</b><br>(mg/dL)       |  <b>54.90%</b> reduction   |
|  <b>Triglycerides (TG)</b><br>(mg/dL)                  |  <b>48.46%</b> reduction   |
|  <b>Very Low Density Lipoprotein (VLDL)</b><br>(mg/dL) |  <b>47.40%</b> reduction   |
|  <b>High Density Lipoprotein (HDL)</b><br>(mg/dL)      |  <b>27.59%</b> improvement |

These findings demonstrate the **POTENTIAL EFFECTIVENESS**  
of the **HEART CARE** formulation in  
**SUPPORTING HEALTHY LIPID PROFILE** and overall  
cardiovascular wellness.
