

CLINICAL RESEARCH HIGHLIGHTS –

NATURAL COUGH & COLD

In a randomized controlled clinical evaluation conducted over **5 DAYS**,
the reported outcomes included:

CLINICAL PARAMETER		REPORTED OUTCOME		
	Daytime Cough Relief (After 5 days of treatment)	↓	83%	Improvement
	Nighttime Cough Relief (After 5 days of treatment)	↓	90%	Improvement
	Throat Irritation (Within 5 days)	↓	93%	Improvement
	Throat Clearing & Sore Throat (Resolution of symptoms)	↓	>90%	Relief
	Relief After First Morning Dose (Cough and throat irritation)	↑	95%	Responders
	Symptom Relief Duration (Up to 4 hours by Day 5)	↑	>90%	Responders
	No Drowsiness / Maintained Alertness (Throughout the study)	↑	>90%	Alert
	Recurrence of Cough (Day 15 follow-up)	↓	0%	No Recurrence
	Safety Profile (Adverse events)	—	Safe	—

These findings suggest that the **PLANT-BASED NATURAL COUGH & COLD FORMULA** may support **FASTER COUGH RELIEF, THROAT COMFORT, MAINTAINED ALERTNESS,** and **OVERALL RESPIRATORY WELL-BEING** when used within an appropriate short-term symptom care program.
