

CLINICAL RESEARCH HIGHLIGHTS -

VIRAL CARE

In a clinical evaluation conducted over approximately **10 DAYS**,
the reported outcomes included:

CLINICAL PARAMETER		REPORTED OUTCOME	
	Faster RT-PCR Negativity (Day 4, 7 & 10)	 >90%	Increase
	Cough Relief (Complete relief in 4 days)	 69%	Improvement
	Breathlessness Relief (Complete relief in 4 days)	 65%	Improvement
	Fatigue Relief (Complete relief in 4 days)	 63%	Reduced
	Reduction in Inflammatory Markers (CRP, LDH, IL-6)	 37% (Average Reduction)	Reduced
	Safety Profile (Adverse Events)	Safe	

These findings suggest that the **PLANT-BASED VIRAL CARE FORMULA** may be effective in **FASTER RECOVERY, REDUCING INFLAMMATION,** and **IMPROVING RESPIRATORY HEALTH** safely over 10 days.
