

CLINICAL RESEARCH HIGHLIGHTS -

VITAMIN B12

In a prospective real-world case series conducted over
60 DAYS, the reported outcomes included:

CLINICAL PARAMETER		REPORTED OUTCOME	
	Clinical Symptom Resolution	 >90%	Improvement
	Serum Vitamin B12	 >90%	Increase
	Hemoglobin	 14%	Increase
	Red Blood Cell Count	 31%	Increase
	Platelet Count	 60%	Increase
	Homocysteine	 55%	Reduced

These findings suggest that the **PLANT-BASED VITAMIN B12 FORMULATION** **improvements in clinical symptoms and biochemical markers over 60 days.**
Larger prospective controlled studies were recommended by the authors.
